HBV Plush Tutorial

Instructions

Step 1.

Print and cut out pattern piece.

Step 2.

Trace pattern piece four times onto the back (non-fuzzy side) of the fleece. Cut out pieces along the line.

Step 3.

Place two pieces against each other, fuzzy sides facing, and sew half the piece along the line.

Step 4.

Spread open the two sides and align a third piece, fuzzy sides together. Sew half the piece along the line.

Step 5.

Repeat Step 4 with fourth piece.

Step 6.

Align final edges together and sew, leaving a 1.5 inch hole. Flip inside out through the hole.

Step 7.

Snip tiny holes for the eyes and place safety eyes into hole. Attach by pushing washer ring inside the plush until tight.

Step 8.

Stuff with fiberfill and sew hole closed with a hidden stitch. Throw a party with your new virus!
